[Fatal Flaws in
the Big Bang
and a
New Cosmic
Model of the
Universe](#)

Did you know that scientific evidence abounds to support the biblical accounts of creation and the flood? Were you aware that reports outlining this evidence passed peer review, and were published in the open scientific literature? Have you heard that, decades later, this evidence still stands unrefuted by the scientific community?

An Overview

Etched within Earth's foundation rocks — the granites — are beautiful microspheres of coloration, halos, produced by the radioactive decay of primordial polonium, which is known to have only a fleeting existence.

The following simple analogy will show how these polonium microspheres — or halos — contradict the evolutionary belief that granites formed as hot magma slowly cooled over millions of years. To the contrary, this analogy demonstrates how these halos provide unambiguous evidence of both an almost instantaneous creation of granites and the young age of the earth.

A speck of polonium in molten rock can be compared to an Alka-Seltzer dropped into a glass of water. The beginning of effervescence is equated to the moment that polonium atoms began to emit radiative particles. In molten rock the traces of those radioactive particles would disappear as quickly as the Alka-Seltzer bubbles in water. But if the water were instantly frozen, the bubbles would be preserved. Likewise, polonium halos could have formed only if the rapidly "effervescing" specks of polonium had been instantly encased in solid rock.

An exceedingly large number of polonium halos are embedded in granites around the world. Just as frozen Alka-Seltzer bubbles would be clear evidence of the quick-freezing of the water, so are these many polonium halos undeniable evidence that a sea of primordial matter quickly "froze" into solid granite. The occurrence of these polonium halos, then, distinctly implies that our earth was formed in a very short time, in complete harmony with the biblical record of creation.

Replies to Objections

Every question regarding the validity or implications of this polonium-halo evidence has been systematically dealt with, in our published [reports](#) and in various discussions with those holding differing views. We invite you to peruse the points we have raised in our [exchanges](#), consider them, and decide for yourself the truth of the matter.

Of particular interest will be our [recent discussion](#) with the Institute for Creation Research (ICR) regarding the validity of our work.

In the [Exchanges](#) section of our website we've posted our letter to Dr. K. R. Walker, requesting the references to successful granite synthesis experiments that UT's Dr. Larry Taylor had referred to. We also have posted two letters from Dr. Brent Dalrymple that refer to the unrefuted Polonium evidence for the creation of granite.

Challenge to the National Academy of Sciences

The Academy has vehemently opposed creation science, even claiming that the evidence for creation has been scientifically invalidated. We have repeatedly [challenged](#) the Academy to publicly explain where the polonium-halo evidence for creation has ever been scientifically invalidated. For over 15 years, they have refused to even try, for they know that their statement is insupportable when it comes to the polonium-halo evidence.

We have posted here [letters and other documents](#) pertaining to our challenge to the National Academy of Science.

Reports

Our published [reports](#) date back to the 1960's. Twenty of these [reports](#) can be downloaded free of charge from this web site. A number of these also appear in the appendix to our book, [Creation's Tiny Mystery](#).

Every question regarding the validity or implications of the polonium-halo evidence for creation has been systematically dealt with in our published [reports](#). Every proposal for an evolutionary origin of polonium radiohalos has been systematically and experimentally falsified. No hypothetical, naturalistic scenario has yet been suggested that can account for Creation's "tiny mystery" of the polonium halo.

Of course, you can find claims to the contrary on the internet and elsewhere. But if these claims had any real substance, they would have passed peer review and been published in the open scientific literature. The fact that they have not been, or have themselves been experimentally falsified, demonstrates the fact that this unique evidence for Creation still stands unrefuted.

Some of our newest research concerns [astronomy and cosmology](#). Our findings provide a radically new model of the cosmos while also showing why the Big Bang Theory is **fatally flawed**. For more on this topic, please see our sister site, www.TheOrionFoundation.com.

Tax-Funded arXiv Engaged in Religious Discrimination

Our sister site, www.TheOrionFoundation.com, has an entire section on this topic. Basically, what happened is that we posted ten papers outlining fatal flaws in the Big Bang theory on the arXiv, an internet service hosted at the time by Los Alamos National Laboratory. The arXiv distributes physics papers worldwide, and we had previously posted papers there with no problem. This time, when those in charge of the arXiv discovered that our papers very clearly outlined the fallacies of the Big Bang, and were supportive of a model of the universe that harmonizes with Genesis, the papers were removed. After we posted them again, they were removed a second time, and our password was revoked.

You can read the subsequent letters that were exchanged by clicking the links on the page "[Documentation of Censorship by the Los Alamos National Laboratory arXiv Staff](#)", a page on our sister site.

The arXiv is funded by tax funds. It is therefore inappropriate for the arXiv to discriminate on the basis of religion against scientists who do not ascribe to evolution.

Videos/DVDs

One of the easiest ways to learn more about polonium halos and similar evidence for creation is to watch our two videos, [Fingerprints of Creation](#) and [The Young Age of the](#)

[Earth](#). Both are available on VHS cassettes and DVD, and both can now be seen immediately over the internet as a free [video stream](#).

Check out our latest video, [Center of the Universe — The Great White Throne](#). In this documentary we explore the amazing astronomical discovery that the universe has a nearby center that can be identified with the location of the Great White Throne, God's dwelling place in the heavens described in the book of Revelation.

Book

Our book, [Creation's Tiny Mystery](#), by scientist Robert V. Gentry, chronicles the evidence of polonium halos, and the challenges of proposing a scientifically-based creation model of the Earth amidst the widespread acceptance by most scientists of ancient, evolutionary models.

The entire book may now be read [online](#), but you'll also want the convenience of having a printed copy to peruse.

To order our book and/or videos,

Call Us at (800) 467-6380, or use our [order form](#).
